

RMS

Remote Management System

A Web based REMOTE MANAGEMENT SYSTEM that allows oil companies monitor the level of oil in their customers tanks and ensure customers continuity of oil supply and guarantees that they will never run out of oil.

“DON'T BE CAUGHT OUT IN THE COLD”

**Direct readout in litres.
Readings in 1 cm (10mm) graduations,
therefore ensuring accuracy in litres
and maximising oil fills at each delivery
unmatched by other systems.**

**Automatic updates for reorder
Secure Customer loyalty
Improved Customer Service
Improved delivery efficiencies.**

Based on the reliable and accurate Apollo Ultrasonic oil tank monitors the information is transmitted to a modem on the premises and via the telephone to the webserver and oil company computer database. All information remains exclusively on the oil companies computer and is password and security code protected.
